2014

20 kmph. What is the average speed of the car?

SUBJECT: PHYSICS	A physical quantity of is found to depend
SESSION: MORNING	TIME: 10.30 A.M. TO 11.50 A.M.

MAXIMUM MARKS	TOTAL DURATION	MAXIMUM TIME FOR ANSWERING
60	80 MINUTES	70 MINUTES

QUESTION DO	OKLET DETAILS
VERSION CODE	SERIAL NUMBER
wector diantif	548417
	VERSION CODE

DOs:

- 1. Check whether the CET No. has been entered and shaded in the respective circles on the OMR answer sheet.
- 2. This Question Booklet is issued to you by the invigilator after the 2nd Bell i.e., after 10.30 a.m.
- 3. The Serial Number of this question booklet should be entered on the OMR answer sheet.
- 4. The Version Code of this question booklet should be entered on the OMR answer sheet and the respective circles should also be shaded completely.
- 5. Compulsorily sign at the bottom portion of the OMR answer sheet in the space provided.

DON'TS:

- 1. THE TIMING AND MARKS PRINTED ON THE OMR ANSWER SHEET SHOULD NOT BE DAMAGED/MUTILATED/SPOILED.
- 2. The 3rd Bell rings at 10.40 a.m., till then;
 - Do not remove the paper seal present on the right hand side of this question booklet.
 - Do not look inside this question booklet.
 - Do not start answering on the OMR answer sheet.

IMPORTANT INSTRUCTIONS TO CANDIDATES

- 1. This question booklet contains 60 questions and each question will have one statement and four distracters. (Four different options / choices.)
- 2. After the 3rd Bell is rung at 10.40 a.m., remove the paper seal on the right hand side of this question booklet and check that this booklet does not have any unprinted or torn or missing pages or items etc., if so, get it replaced by a complete test booklet. Read each item and start answering on the OMR answer sheet.
- 3. During the subsequent 70 minutes:
 - · Read each question carefully.
 - Choose the correct answer from out of the four available distracters (options / choices) given under each question / statement.
 - Completely darken / shade the relevant circle with a BLUE OR BLACK INK BALL POINT PEN
 against the question number on the OMR answer sheet.

Correct Method of shading the circle on the OMR answer sheet is as shown below:

- 4. Please note that even a minute unintended ink dot on the OMR answer sheet will also be recognised and recorded by the scanner. Therefore, avoid multiple markings of any kind on the OMR answer sheet.
- 5. Use the space provided on each page of the question booklet for Rough Work. Do not use the OMR answer sheet for the same.
- 6. After the last bell is rung at 11.50 a.m., stop writing on the OMR answer sheet and affix your LEFT HAND THUMB IMPRESSION on the OMR answer sheet as per the instructions.
- 7. Hand over the OMR ANSWER SHEET to the room invigilator as it is.
- 8. After separating the top sheet (Our Copy), the invigilator will return the bottom sheet replica (Candidate's copy) to you to carry home for self-evaluation.
- 9. Preserve the replica of the OMR answer sheet for a minimum period of ONE year.

A physical quantity Q is found to depend on observables x, y and z, obeying relation The percentage error in the measurements of x, y and z are 1%, 2% and 4% respectively. What is percentage error in the quantity Q?

70 MINUTES (3) 11%

SO MINUTES . (4) 1%

2. Which of the following is not a vector quantity?

DESTION BOOKLET DETAILS

Weight (1)

Nuclear spin

SERIAL NUMBER

(3) Momentum (4) Potential energy

MENTION YOUR

3. A car moves from A to B with a speed of 30 kmph and from B to A with a speed of 20 kmph. What is the average speed of the car?

25 kmph

THE TIMING AND MARKS PR 24 kmph

- 50 kmph
- hqmx 10 kmph right hand side of this question

A body starts from rest and moves with constant acceleration for t s. It travels a distance x_1 in first half of time and x_2 in next half of time, then

- After the 3rd Bell is rung at 10.40 a.m., remove the paper seal on the right hand side of this question booklet and
- check that this booklet does not $1/2 = x_1 = x_1$ and this booklet does not be $1/2 = x_2 = x_1 = x_1$. (1) replaced by a complete test booklet. Read each item and start answering on the OMR answer
 - (3) $x_2 = 3x_1$

(4) $x_2 = 4x_1$ which of managed as add a direct

Preserve the replica of the OMR answer sheet for a minimum period of OME year.

against the question number on the OMR answer sheet.

Space For Rough Work

Completely darkon / shade the relevant circle with a BLUE OR BLACK DVK BALL POUVT PEN

Correct Method of shading the circle on the OMR answer sheet is as shown below:

After the last bell is rong at 11.50 a.m., stop writing on the OMR answer sheet and affix your LEFT HAND

Turn Over

A person is driving a vehicle at uniform speed of 5 ms⁻¹ on a level curved track of radius 5. 5 m. The coefficient of static friction between tyres and road is 0.1. Will the person slip while taking the turn with the same speed? Take $g = 10 \text{ ms}^{-2}$.

Choose the correct statement.

- (1) A person will slip if $v^2 = 5 \text{ ms}^{-1}$ (2) A person will slip if $v^2 > 5 \text{ ms}^{-1}$
 - (3) A person will slip if $v^2 < 5 \text{ ms}^{-1}$ (4) A person will not slip if $v^2 > 10 \text{ ms}^{-1}$
- A stone is thrown vertically at a speed of 30 ms⁻¹ making an angle of 45° with the horizontal. What is the maximum height reached by the stone? Take $g = 10 \text{ ms}^{-2}$.

A 10 kg metal block is attached to a spring of spring constant 1000 Nm⁻¹. A block is

- displaced from equilibrium and released. The maximum and released of more and released of more and more and released. The maximum and released of more and released of the more
 - (3) 15 m

32. A force between two protons is same as the force between proton and neutron. The nature of the force is

- (1) Weak nuclear force
- (2) Strong nuclear force
- (3) Electrical force
- (4) Gravitational force

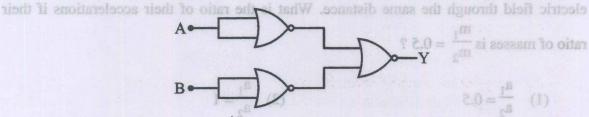

(3) 6.25×10^{27}

(1) Scalar

33. In n type semiconductor, electrons are majority charge carriers but it does not show any negative charge. The reason is

- (1) electrons are stationary
 - (2) electrons neutralize with holes
 - (3) mobility of electrons is extremely small
 - (4) atom is electrically neutral

34. For the given digital circuit, write the truth table and identify the logic gate it represents:

(1) OR-Gate

(2) NOR-Gate

(3) NAND-Gate

(4) AND-Gate

35. If α -current gain of a transistor is 0.98. What is the value of β -current gain of the transistor?

(1) 0.49

(2) 49

(3) 4.9

(4) 5

36. A tuned amplifier circuit is used to generate a carrier frequency of 2 MHz for the of the force is amplitude modulation. The value of \sqrt{LC} is

$$(1) \quad \frac{1}{2\pi \times 10^6}$$

(1)
$$\frac{1}{2\pi \times 10^6}$$
 is not served. (2)
$$\frac{1}{2 \times 10^6}$$
 or of isomorphism (8)

(2) 20 A

(3) 100 A

(4) 2 A

58. The average power dissipated in A.C. circuit is 2 watt. If a current flowing through a circuit is 2 A and impedance is 1 Ω , what is the power factor of the AC circuit?

(2) 1

(4) $\frac{1}{\sqrt{2}}$

59. A plane electromagnetic wave of frequency 20 MHz travels through a space along x direction. If the electric field vector at a certain point in space is 6 V m⁻¹, what is the magnetic field vector at that point?

(1)
$$2 \times 10^{-8} \text{ T}$$

(2)
$$\frac{1}{2} \times 10^{-8} \text{ T}$$

(4) $\frac{1}{2} \text{ T}$

(4)
$$\frac{1}{2}$$
 T

Two capacitors of 10 PF and 20 PF are connected to 200 V and 100 V sources 60. respectively. If they are connected by the wire, what is the common potential of the capacitors?

(1) 133.3 volt

(2) 150 volt

(3) 300 volt (4) 400 volt

- '57. A step down transformer has 50 turns on secondary and 1000 turns on primary winding. If a transformer is connected to 220 V 1A A.C. source, what is output current of the transformer?
 - (1) $\frac{1}{20}$ A
 - (3) 100 A

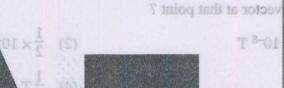

- The average power dissipated in A.C. circuit is 2 watt. If a current flowing through a circuit is 2 A and impedance is 1 Ω , what is the power factor of the AC circuit?

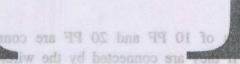

(2) 1

space along x omagnetic wave of frequency 20 MHz travels what is the e electric field vector at a certain point in spa
